

Your free website account

About 10 minutes · free · nothing to install

Your new website will live in a free account in **your own name**, so it's truly yours and keeps running without us. The account is with **Cloudflare**, the company that keeps your website online.

You'll need: your business email and about 10 minutes. A computer is easiest, but a phone works too.

- 1 **Create your account.** Go to **dash.cloudflare.com/sign-up**. Type your business email, make up a strong password (keep it somewhere safe), and click **Create Account**.
- 2 **Confirm your email.** Cloudflare sends you an email. Open it and click the link inside. Can't find it after a few minutes? Check your spam folder.
- 3 **Add us as a helper.** In Cloudflare, open **Manage account**, then **Members**, then click **Invite**.
 - In the email box, type **hello@plainstreetstudio.com**
 - Under **Roles**, tick these two boxes: **Workers Platform Admin** (lets us put your website into your account) and **DNS** (lets us connect your web address). No web address yet? The first box is enough.
 - Please **don't** tick Super Administrator or Administrator. We don't need them.
 - Click **Continue to summary**, then **Invite**.
- 4 **Tell us it's done.** Reply to our email, tick "Done" on your setup page, or text us. That's all!

What happens next: we put your website into your account, connect your web address, and check that everything works. We'll email you when it's live.

Good to know

- **It's free.** Your website doesn't need a paid plan. If Cloudflare ever asks you to pick one, choose **Free**.
- **Your password stays yours.** We'll never ask for it. The invite is all we need.
- **It's your account.** You can see who has access under **Manage account** → **Members**, and you can remove us any time. Just tell us first: we'll finish any open changes and send you a fresh copy of your site, and your website stays online. You can invite us back whenever you like.
- **Extra safety (optional):** turn on two-step sign-in under **My Profile** → **Authentication**, and keep the backup codes it gives you somewhere safe.
- Cloudflare's own terms apply to your account; you agree to them when you sign up.
- **Something looks different on your screen?** No problem. Email or call us and we'll walk you through it.
